WHO WE ARE

LIFTING & MOVING LOADS SINCE 2004

WB Services is a family-run Hiab hire, contract lifting and haulage company based in Darenth, Dartford. For more than 20 years we've been lifting and moving loads across London and the South East.

From our depot on Green Street Green Road we run small, medium, long reach and heavy lifting Hiabs. That covers everything from a single pallet drop over a garden wall to steelwork at roof level and complex, fully managed CPA contract lifts.

We're built on safety, precision and doing what we say. Every lift is properly planned, and our drivers and operators are trained, experienced and fully kitted out in PPE. We work alongside you on site to get the job done safely and on time.

WHY CONTRACTORS CHOOSE WB

- ▶ **The right machine for the lift:** small to long reach and heavy lifting Hiabs, spider cranes and tracked carriers under one roof.
- ▶ **Planned properly:** free site surveys, Appointed Persons and 2D/3D CAD lift plans with RAMS.
- ▶ **London ready:** FORS Gold, CLOCS and Direct Vision Standard compliant trucks.
- ▶ **Certified and audited:** ISO 9001:2015, ISO 45001:2018, and members of the CPA, RHA and ALLMI.
- ▶ **One team, end to end:** deliver it, lift it and place it, in one visit.

WHERE WE WORK

From Darenth, just off the M25 and A2, we reach London, Kent, Essex, Surrey and the wider South East, including Sussex and Berkshire.

Major infrastructure: we're a preferred logistics supplier supporting some of the UK's largest government-funded projects, including HS2, Crossrail, Thames Tideway and Riverlinx.

"Was absolutely blown away by the professional and approachable team supplied by WB, Darren was fantastic to deal with by email and on the phone, detailing this very tricky lift and haul, which had been declined by another company due to the difficulties accessing the site. Not a problem for these guys who smashed it and clearly enjoyed the challenge. 100% satisfaction. Accept no substitute."

WHAT WE DO

LIFTING & TRANSPORT, SORTED

From a single pallet over a garden wall to steelwork at roof level, we've got a Hiab, a spider crane or a fully managed contract lift for the job. Every hire comes with a trained operator.

HIAB HIRE

Small and medium Hiabs that deliver and lift in one visit, with no separate crane or forklift needed. Ideal for building materials, cabins, plant and tight residential streets.

LONG REACH HIAB HIRE

Long reach Hiabs with up to 32m reach for lifting over buildings, scaffolds, trees and gardens. Our Fassi F1050 gives a 37m tip height and 33.4m hydraulic outreach.

HEAVY LIFTING HIAB HIRE

Heavy lifting Hiabs for containers, site cabins, modular units, plant, machinery and steelwork, with tandem lifts using two Hiabs where needed.

CPA CONTRACT LIFTING

Fully managed lifts under CPA contract lift conditions. We plan it, we run it and we take responsibility for it, with CPA Standard Contract Lift insurance.

SPIDER CRANE HIRE

Compact spider cranes that fit through gates and doorways and set up on small footprints, for indoor, courtyard, back garden, rooftop and glazing lifts.

TRACKED CARRIER HIRE

The full range of Aconda tracked carriers: remote-controlled, low-bed machines that move heavy loads through narrow gaps, up slopes and stairs and across soft ground.

MACHINERY INSTALLATION

Transport, precision lifting and final positioning by one team, with RAMS. We can add spider cranes or tracked carriers for confined spaces.

HIAB HAULAGE

Hiab and drawbar trailer combinations that move more in one trip and offload with the truck's own crane, so there's no waiting for a forklift on site.

GENERAL HAULAGE

Flatbed haulage up to 44t GVW for building materials, plant, machinery and large items, with a transport plan built around your load and site.

LIFT PLANNING & CRANE MATS

Free site surveys, 2D/3D CAD lift plans and drawings from our Appointed Persons, and crane mats for a stable, safe set-up on site.

LONG REACH SPOTLIGHT

VOLVO FMX + FASSI F1050 HXP

Our newest and biggest Hiab. With its 9-extension main boom and 6-extension L436 fly jib, the F1050 reaches places other Hiabs can't, so many jobs that would need a mobile crane can be done from the truck.

33.4_m

Hydraulic outreach

22,000_{kg}

Max capacity, main boom
close in

905_{kg}

Capacity at 33.4m outreach

- ▶ Fassi F1050 HXP: 9-extension main boom + 6-extension fly jib
- ▶ Volvo FMX chassis
- ▶ Built for roof-level glazing, steel and plant
- ▶ Alongside our other long reach Hiabs with up to 32m reach
- ▶ Load charts available on request

WHICH CRANE DO I NEED?

Typical figures by crane class from manufacturer load charts. Every lift is checked against the actual chart for the machine, radius and set-up.

Crane class	Max hydraulic reach	With fly jib	Max capacity (close in)
Small Hiabs	12.25–14.55m	Ask us	8,000–11,500kg
Medium Hiabs	14.4–16.3m	Ask us	13,500–15,500kg
Long reach Hiabs	18.25–18.3m	Up to 32m	16,000–21,500kg
Heavy lifting Hiabs	19.65m	Ask us	22,000kg
F1050 HXP + L436	33.4m outreach	37m tip height	22,000kg (main boom)

CPA CONTRACT LIFTING

WE PLAN IT. WE RUN IT. WE TAKE RESPONSIBILITY.

If you need a lift done but don't have the lifting expertise in-house, book it as a CPA contract lift. We take responsibility for planning and managing the lift, from the first site visit to the final sign-off, working to CPA (Construction Plant-hire Association) standards, BS 7121 and the CPA Model Conditions.

WE MANAGE THE LIFT

CPA CONTRACT LIFT

- ▶ Appointed Person plans the lift
- ▶ Site-specific 2D/3D CAD lift plan, drawings and RAMS
- ▶ Crane supervisor on site
- ▶ Slinger/signaller and trained operator
- ▶ CPA Standard Contract Lift insurance

YOU MANAGE THE LIFT

STANDARD CPA HIRE

- ▶ We supply the Hiab and a trained operator
- ▶ You provide the lift plan and supervision
- ▶ You arrange insurance for the load and operation
- ▶ You take responsibility for third-party risks

2D & 3D CAD LIFT PLANS

Every contract lift comes with a CAD lift plan showing the crane position, outrigger footprint, lift path and landing area, so everyone on site can see exactly how the lift will run before the day.

FREE SITE SURVEYS

We check access, ground conditions, overhead hazards and the landing area. For some jobs good photos, drawings and measurements are enough, and we'll tell you which applies.

FROM ENQUIRY TO SIGN-OFF

01

ENQUIRY

Tell us about the load, the site and the date. Photos help.

02

SITE SURVEY

Access, ground, overhead hazards and the landing area checked.

03

LIFT PLAN & RAMS

Our Appointed Person sends a 2D/3D CAD lift plan, drawings and RAMS.

04

THE LIFT

Operator, crane supervisor and slinger/signaller carry out the lift as planned.

05

SIGN-OFF

We make the area safe, pack down and confirm the job is complete.

MAJOR PROJECTS

TRUSTED ON MAJOR INFRASTRUCTURE

Preferred logistics supplier supporting some of the UK's largest government-funded infrastructure projects, including HS2, Crossrail, DLR, Thames Tideway, Riverlinx, Sizewell C and the Olympic Park.

Rail support partner: Hiab and lifting support for rail projects, including possession work, weekends and nights.

STORY

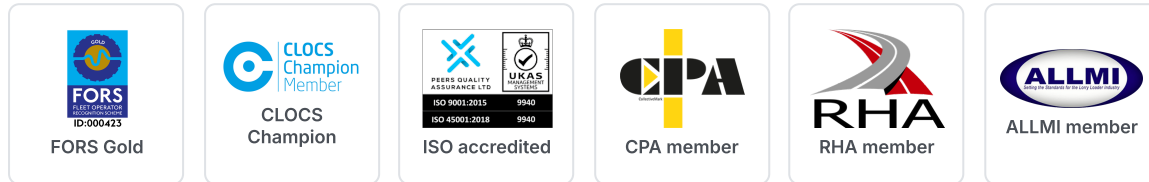

Logos and names are trademarks of their respective owners and are shown to identify contractors we have worked for.

ACCREDITATIONS & SAFETY

SAFETY FIRST, ON EVERY JOB

We hold the certifications, accreditations and memberships main contractors and London sites ask for, and every member of our team is expected and encouraged to stop any job that doesn't feel right.

EVERY TRUCK, FITTED TO FORS STANDARDS

- 360° / onboard cameras
- Side under-run guards
- Proximity sensors
- Audible left-turn warnings
- Reversing cameras
- GPS tracking
- DVS compliant, permits in place
- Euro 6 emissions compliant
- CLOCS & LEZ compliant

PLANNED LIFTS

Every lift is planned. For contract lifts our Appointed Person surveys the site where needed and produces a lift plan and RAMS, following BS 7121 and the CPA Model Conditions.

SAFE EQUIPMENT

Cranes, lifting accessories and vehicles are thoroughly examined by competent independent examiners under LOLER and PUWER. Accessories are examined every six months, with daily walkaround and crane checks.

TRAINED PEOPLE

Operators and drivers are trained and assessed for the equipment they use, hold the right licences and Driver CPC, and take part in regular refresher training and toolbox talks.

SAFETY ON SITE

The right PPE on every job, clear exclusion zones with barriers and signage, and nobody under a suspended load. We follow each site's rules and inductions.

ON THE ROAD

As an O-licence holder we manage drivers' hours, working time and tachograph records in line with DVSA rules, and regularly check driving licences.

ALWAYS IMPROVING

We encourage reporting of all accidents, near misses and concerns, investigate them properly and report under RIDDOR where required.

INDUSTRIES WE SERVE

UTILITIES	CONSTRUCTION	AVIATION	RAIL & INFRASTRUCTURE	GLAZING & CURTAIN WALLING
PLANT & MACHINERY	STEEL & MODULAR BUILDINGS	EVENTS & EXHIBITIONS	DOMESTIC & RESIDENTIAL	TELECOMS

AREAS WE COVER

London, Kent, Essex, Surrey and the wider South East, including Sussex and Berkshire. Our Darenth depot sits right by the M25 and A2, so we're quickly on site across the region. Tell us the postcode and we'll plan the job around your programme.

TO QUOTE, WE NEED

- ▶ Site address or postcode
- ▶ The load: weight and size
- ▶ Where it needs to go, and any access limits
- ▶ Your preferred date, plus site photos
